

D-Sub PushPull

Product Launch

Pushing Performance
Since 1945

D-Sub PushPull

Simplify classic connections

Highlights

- Retrofit
- PushPull
- > 50% time saving
- The Packaging
- Coding system
- Reliability

D-Sub PushPull

Simplify classic connections

Easy retrofit!

Screw the upgrade pin into the screw lock on the device side...

... PUSH the assembled hood onto the pins

D-Sub PushPull

Simplify classic connections

True PushPull function!

Wherever you want to grab

USP

D-Sub PushPull

Simplify classic connections

Save Time!

Screws for strain relief clamp

No screws to close the hood

Easy PushPull cover assembly from the front

USP

D-Sub PushPull Simplify Packaging

Packaging is important!

- Less plastic
- Clear separation
- QR-Code with link to assembly instruction

D-Sub PushPull

Simplify classic connections

No mis-mating!

Versions with two slits allows the customer to implement the D-Sub coding system

USP

D-Sub PushPull Reliability

Proven!

proven cable clamp resistance to
cable pull and cable torsion

Shock and vibration proof as per
IEC 61373 - Category 1, Class B

10.000 mating cycles*

Hold time	Result			Conclusion
	750 cycles	5000 cycles	10000 cycles	
60s	Housing not unlocked	Housing not unlocked	Housing not unlocked	Passed
	Housing not unlocked	Housing not unlocked	Housing not unlocked	Passed
	Housing not unlocked	Housing not unlocked	Housing not unlocked	Passed

* Applies to the PushPull mechanism only.
D-Sub connectors are standardised to a
maximum of 500 mating cycles (PL1).

D-Sub PushPull Competition

No single source!

HARTING solution offers a
true PushPull function

PushPull

There are already two fast
locking mechanisms on the
market and HARTING D-Sub
PushPull is compatible.
Only HARTING offers true
PushPull functionality.

USP

D-Sub PushPull

Quick Info cable side

The cable side!

- Size 1, 2 and 3 (09, 15, 25 pole)
- Plastic and metallized plastic version
- Standard or for coding
- MOQ for hoods is 10 pcs.
- Packaging is 10 pcs.
- No sample part numbers

12 part numbers in total

D-Sub PushPull

Quick Info cable side details

Hood overview

Hood Size	Hood Type	One slit (standard)	Two slits (for coding)
1	Plastic	09 67 009 0200	09 67 009 0200 160
	Metalized Plastic	09 67 009 0210	09 67 009 0210 160
2	Plastic	09 67 015 0200	09 67 015 0200 160
	Metalized Plastic	09 67 015 0210	09 67 015 0210 160
3	Plastic	09 67 025 0200	09 67 025 0200 160
	Metalized Plastic	09 67 025 0210	09 67 025 0210 160

D-Sub PushPull

Quick Info cable side details

Cable clamp overview

Internal strain relief clamp
always included

Cable diameter
5 - 7 mm

External strain relief clamp
to be ordered separately

Cable diameter	External cable clamp
5 - 7 mm	61 03 000 0141
7 - 10 mm	61 03 000 0044
9 - 12 mm	61 03 000 0143
11 - 14 mm	61 03 000 0148

D-Sub PushPull

Quick Info device side

The device side!

- Different locking bolts depending on type of installation
 - front mount; rear mount; upgrade pins
- standard or for coding
- MOQ for bolts is 20 pcs.
- packaging is 20 pcs.
- No sample part numbers

34 part numbers in total

D-Sub PushPull

Simplify classic connections

Features at a glance

- Available in plastic and metallized plastic versions in sizes 09, 15, and 25
- Suitable for D-Sub Standard, D-Sub mixed, D-Sub High-Density, and more
- Tool-free installation with screwless assembly for simple connectivity
- Shock and vibration proof as per IEC 61373 - Category 1, Class B
- Choice of internal or external cable clamp
- Cable diameter up to 14 mm
- Up to 3 cable entries
- Compatible with HARTING coding system, offering up to 36 variations
- True PushPull function

New D-Sub Coding System

Why do customers need a coding system?

Our solution!

Coding System for D-Sub Size 1 and Size 2

Product features at a glance

Available and possible versions, further sizes

Why do customers need a coding system?

- **For a lot of measuring-, communication-devices and controll units it is necessary to avoid abusive or coincidental mismating. The marking with a label or a sign is sometimes not enough.**
- **A mechanical coding prevents that damages occure and associated with it repair costs and interruptions can be avoided**
- **a coding supported by colored mating partners makes it easier for the user to assemble the right connectors into the right device**

Our solution: Coding system for rear mounted connectors at a panel thickness of 1,6-2,0mm!

Assembly view

Explode view

Our solution: coding system for rear mounted connectors at a panel thickness of 1,6-2,0mm!

Explode view for female coding system

Explode view for male coding system

The combination of 6 different coding block designs molded to the 4 edges of the metal frame result a unique mechanical coding in 36 combinations!

Coding System for D-Sub Size 1

female coding system

Product features at a glance

- ✓ **Up to 36 different mechanical coding combinations possible**
- ✓ **Robust design**
- ✓ **Coding elements made of plastic on a metal frame**
- ✓ **4 different colors are possible: black, yellow, red and green**
- ✓ **Can be used with InduCom, -Inducom9 and D-Sub hoods with 2 slits**
- ✓ **Easy assembling to the hoods**
- ✓ **Easy assembling to panel mount or PCB connectors with special female screwlocks**
- ✓ **Thus easily adaptable on existing applications**
