

# Lumberg Automation Wash-down Connectors

Increase productivity with connectors that remain reliable even when subjected to extreme temperatures and excessive mechanical stress caused by high-pressure cleaning.

**Fast and easy** commissioning saves time and costs

**International applicability** with global compliance industry standards (UL and ECOLAB)

**Industrial protection class IP69K** and resistance to aggressive chemicals guarantee long-term functional reliability

## Ruggedized Quality

These new wash-down connectors use industry-proven M8 or M12 technology and come with ECOLAB's seal of quality and UL certification for operation at up to 65°C. In other words, they can withstand the highest temperatures, but they also fulfill the most stringent requirements concerning impermeability and resistance to aggressive chemicals and cleaning agents. This ensures reliable data transmission at all times even under extreme environmental conditions.

**Be certain.  
Belden.**

## Applications:

The wash-down connectors have been developed for use in the food and beverage sector and in the chemical and pharmaceutical industry. They can be used in bottling plants either for bottling and packaging or bottle cleaning applications since they provide a high standard of hygiene.

This is particularly relevant when reconfiguring production lines. Components need to be suitable for dismantling and reassembly plus be able to withstand cleaning agents. These new wash-down connectors are ideal for this use.

Tell us about the requirements of your applications. Then, let us put our years of experience to work for a custom solution that meets your challenges.

## Benefits:

Lumberg Automation wash-down connectors are simple and easy to install, saving you both time and costs.

For maximum flexibility, these M8 and M12 versions are available as straight and right angle connectors. Our wash-down series is also extremely versatile, comprising various numbers of poles and cable lengths (cables are available by the meter).

Additionally, they offer long-term functional reliability due to meeting industrial protection class IP69K and they are resistant to aggressive chemicals.

*IP67/IP68/IP69K  
Connectors for  
temperatures up to 65°C,  
UL certified.*

## Broad Product Range with M8 and M12 Connection Technology for Wash-down Applications

Available in versions with different numbers of poles, these wash-down connectors are designed for temperatures of -40°C to +105°C in compliance with the VDE standard. Gold-plated crimp contacts ensure reliable data transmission. Designed for high shock and vibration applications, the connectors can also be used in harsh environmental conditions. In addition, the connectors are characterized by high resistance to aggressive chemicals and cleaning agents and are ECOLAB certified.
