# OMNIMATE Housings

## Housings for electronics

**The perfect platform for form and function – including terminal layouts, bulk products and “tailor-made suits straight off the rack”.**

Weidmüller's electronics provide a state-of-the-art platform for electronics applications: for all design types and usage areas. The application and its requirements are the foundation for the housing design:

Component housings using the standard pitch sizes are particularly well suited for standardised electrical cabinet applications.

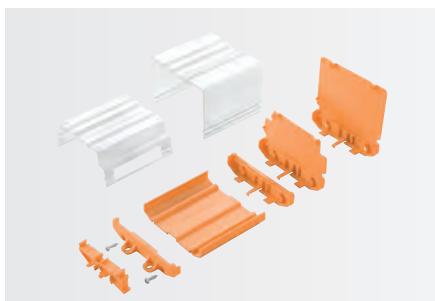

Because of their excellent flexibility and variability, profile housings are the perfect solution for custom constructions and small-batch series.

The perfect blend of design, connection technology and functionality result in a design that is well tailored to market and application requirements.

### Flexibility

Profile housing – the perfect solution for custom constructions and smallbatch series.

### Innovation

Attention to detail: with the integrated, captive "AutoSet" coding function.

**Reliability**

Weidmüller's legendary quality and well established, proven connection technology guarantee maximum availability for your systems.

**Component housing for mounting on rail**

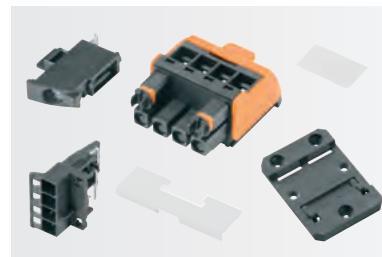

Component housing: function, form and processing all contribute to a single cohesive unit that offers safety, manufacturing efficiency and usability.

**Assembly housing in profile shape**

Assembly housing in profile shape - the flexible modular system of coloured and transparent plastic profiles and support modules provides the optimum balance between flexibility and efficiency.

**Accessories**

Comprehensive range of system accessories for integrating your assembled electronics "package" into the system environment - from attachment and connection to marking systems.

**Efficiency**

Reduce costs and increase productivity:  
SMT/SMD connectors packed suitably for fully automated production.

**Electronics housings**

With 6 housing systems, Weidmüller's electronics housing portfolio offers a platform for electronic applications in any design and for all application areas.

Detailed design information and the most important product-related data is available on the respective product pages. Data sheets and CAD models are available online for download.

**System description (key points)**

**Additional features**

optional (excerpt)

standard (excerpt)

**CH20M – Modular component housing**

Page L.6

**Component housing system IP 20**

- 7 housing widths from 6 to 67.5 mm:
- 6,1 / 12,5 / 17,5 / 22,5 / 35<sup>1)</sup> / 45 / 67,5
- Individually configurable
- 100% reflow soldering compatible (automated)
- Networked with mounting rail bus

**Connectors (touch-safe both sides)**

- 4 - 72
- 1 - 3

**Individually configurable**

- Asymmetrical port configuration
- Individual processing / modification
- Large net layout space of up to 9000 mm<sup>2</sup>
- Up to 3 flexibly positioned PCBs
- Both sides can be fitted with components (underside: + 5mm)
- Pad & laser printing
- Device markers for female connector
- Device markers for hinged cover

**Optional or standard**

- Integrated mounting rail bus
- FE mounting rail contact
- Connection areas: lockable slots
- Integrated, captive 16-fold "AutoSet" coding
- Integrated ejector and plus / minus screws
- "Wire ready" and "wire guard" (protection against mis-inserting)
- Transparent hinged cover, sealable

**Legend of symbols**

Clamping yoke screw connections

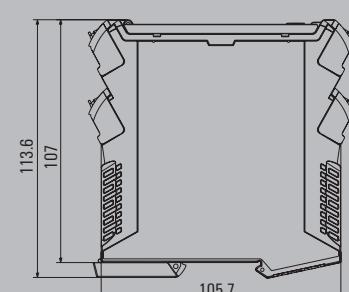

"PUSH IN" spring connection

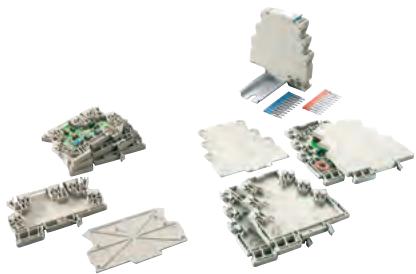

Tension clamp connection

**Note:** 1) On request

**Housing dimensions (exemplary)**

**MICROBOX – Small housing****TERMINALBOX – Terminal housing**

Page L.38

**Small housing IP 20**

- MICROBOX: 6.1 mm
- TERMINALBOX: 6.0 mm
- Miniature plate housing
- Compact enclosure in terminal format
- E.g. for I/O-plate applications

**Connection terminals**

- 4 - 6
- 2 - 3

**2 versions**

- MICROBOX: closed
- TERMINALBOX: optionally with cover plate

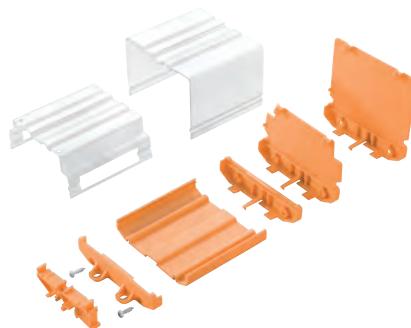

- Pad-print printing

**Optional**

- Cross-connector 32 A

**RS 45-122 – Profile housing variable**

Page L.42

**Variable extruded profile case IP 20**

- Standard length 2 m, optionally cut to size
- Circuit boards 45 to 122 mm
- Precisely cut lengths
- Modules protected with a clear cover

**Female connectors or terminals**

- As needed
- 1 - 3

**Combinable and a perfect fit**

- See-through covers in 2 sizes
- End plates in 3 sizes
- Standard circuit cards (EURO format)
- Up to 2 PCBs stackable
- Double-sided installation
- Pad-print printing
- Standard connector markings
- Marking strips for the cover hood

**Optional**

- Direct mounting

**RS 70 – Profile housing modular**

Page L.47

**Modular profile case IP 00**

- Individual elements, stackable modular
- Elements of 5 / 10 / 15 / 25 / 30 / 45 mm
- For 68 mm circuit boards
- Tool-free installation
- Sub-assembly accessible when opened

**Female connectors or terminals**

- As needed
- 1 - 3

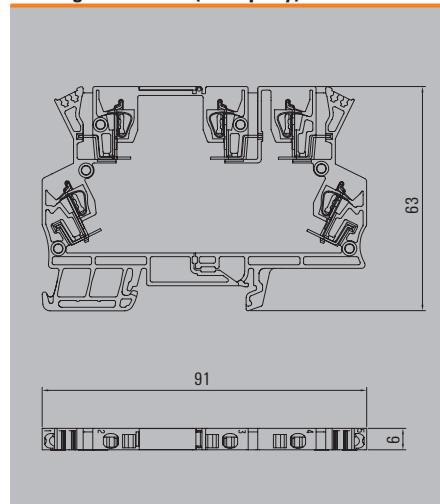

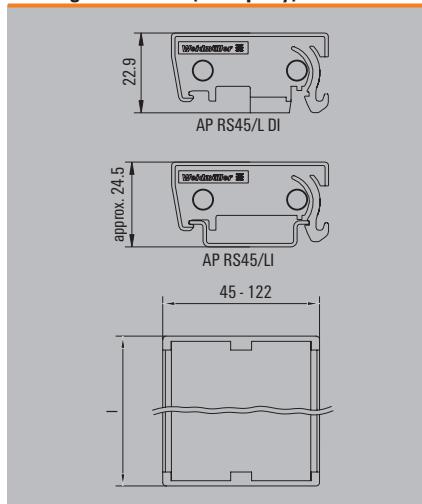

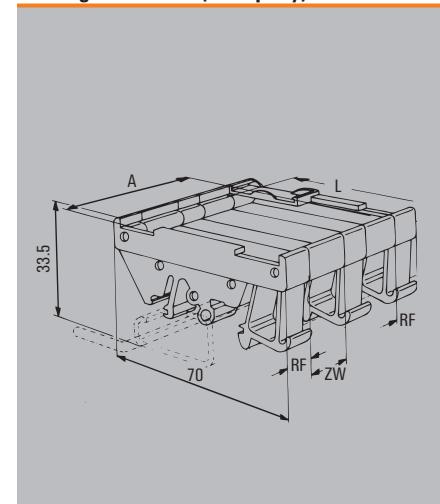

**tool-free installation**

- 4 snap-on feet
- 5 different intermediate elements
- Standard circuit boards
- Double-sided installation

- Pad-print printing
- Standard connector markings

**Optional**

- Direct mounting

**Housing dimensions (exemplary)****Housing dimensions (exemplary)****Housing dimensions (exemplary)**

## Individual design by combining form, function and appearance

**CH20M (Component Housing IP 20 Modular) – Weidmüller's new housing standard – represents the ideal platform for basing customised electronic applications.**

Like a "tailor-made suit straight off the rack", the ground breaking module concept combines freedom in design with the low cost and planning security of a standard system.

In addition to scalability, a high level of safety and innovative functionality in the application, the system also convinces with superior attention to detail.

The results are quicker installation, user-friendly operation, high operational reliability and resistance to interference. From development to production, the CH20M represents efficiency. It covers all of the requirements for a modern electronics platform built with the future in mind.

### Designed configuration

As many connections as you require and as affordable as you need: scalable connection levels, up to 72 wire connections, individually configurable for each side with 1, 2 or 3 connection levels across all housing widths.

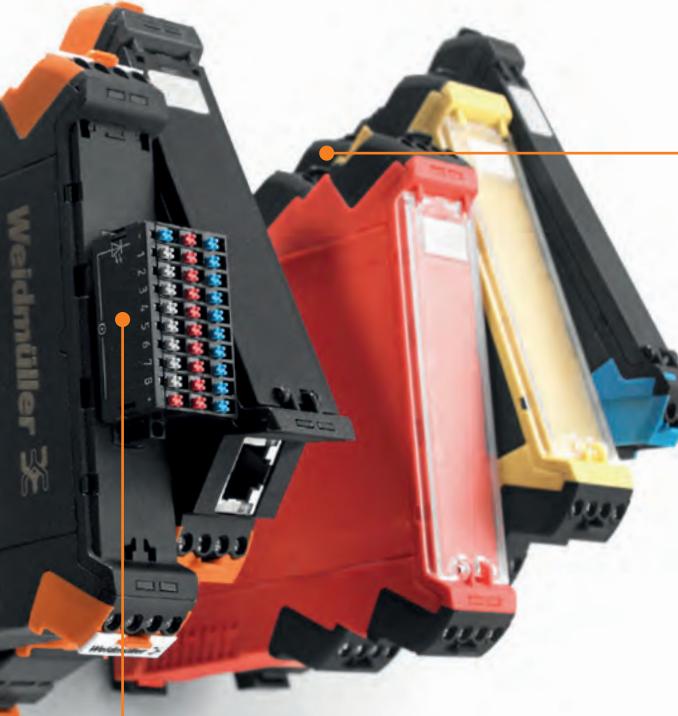

### Designed basic colours

With a focus on the important elements: the unobtrusive housing colours (black graphite, grey graphite and light grey) make a competent impression without distracting from the key operational and display elements.

**Designed printing**

Detailed symbols, data, graphics or text can be printed (with either laser or pad printing) on the large surface available on the housing element.

**Designed modifications**

Modifying after the configuration: for example by integrating the pluggable 30-pole BL-I/O LED digital I/O connection level in the front or with the RJ45 socket on the side.

**Designed optical appearance**

The standard variants, with their modularity and variety, enable you to customise a wide range of designs to fit your application.

**Designed functionality**

Our comprehensive, standardised configuration variants can be further supplemented with modification and design changes to fit your custom needs.

**Designed functional colours**

More operational confidence with functionally appropriate colour coding: three functional colours (red, yellow and blue coding) can be assigned to key industrial applications.

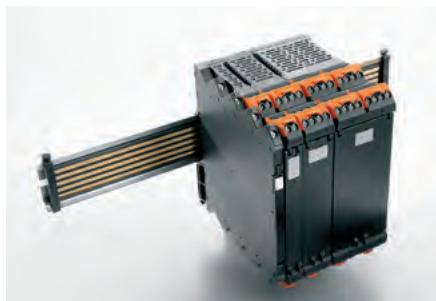

## Power, signals and data are provided, connected and distributed securely and consistently

This customer-friendly bus solution brings power, signals and data to the rail in a quick and reliable manner. When supplying, connecting or distributing within modular applications, the rail bus can replace the tedious individual wiring process with a flexible and uninterrupted system solution. As a result, the wiring overhead and the error rate are both reduced. Redundant functions within complex applications can be efficiently centralised or intelligently distributed.

The system bus is securely integrated within the 35 mm standard mounting rail. The SMD-bus contact block can be reflow-soldered so that it can be completely automatically processed during the component assembly. The resistant, gold-plated contact surfaces ensure a permanent and reliable contact for all housing widths.

### Scalability with no limits

**Unique:** The integrated connection solution covers all system widths: from the 6 mm slice to the 67 mm large-area housing.

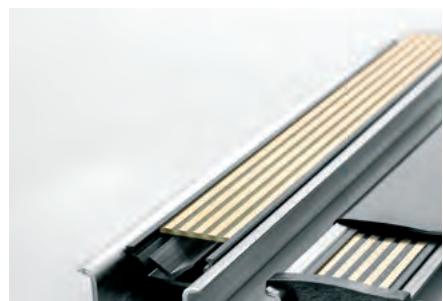

### Easy to service during installation:

**Quick:** It's easy to replace a module, even in existing modules groups – without any influence on the neighbouring modules.

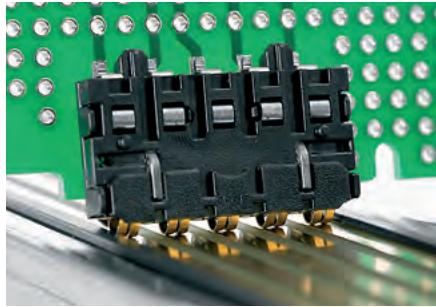

### Unlimited configuration

**Compatible:** The individual modules can be positioned anywhere on any TS 35 standard top-hat rail. Unused areas are safely covered.

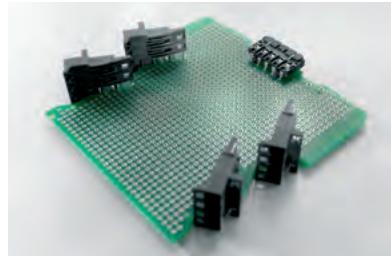

**Maximum availability:**

Reliable: Five fully-galvanised and partially gold-plated twin-arched contacts are used to establish a permanent contact to the rail bus. THR solder flanges ensure that the connection to the circuit board is stable.

**Affordable assembly**

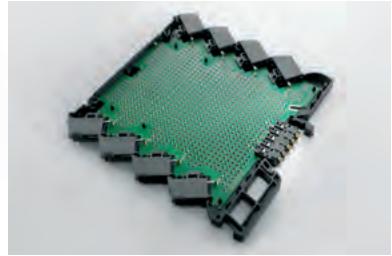

Fully automatic: No manual post processing is required for the bus contact block – it is processed with the assembly group in a single SMT assembly process.

**Safe installation**

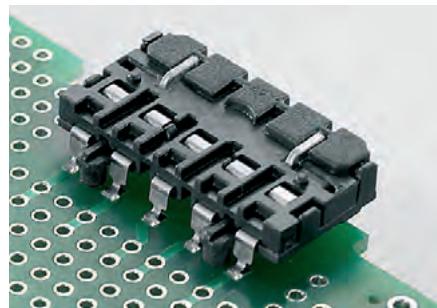

Low loss: You can safely avoid undesired bus interruptions and high contact resistances. Maximum facility availability ensured by the gold-plated contact surfaces on the system bus and contact block, as well as the consistent system design.

**More flexibility in design**

From design through production to application - CH20M6 sets the market standard with maximal board space with minimal exterior dimensions as well as allowing fully automatic reflow processing or bus connections.

**State-of-the-art processing**

Efficient: The SMD-compatible bus contact block is made from high-temperature-resistant LCP. It is designed for the SMT reflow process and is delivered in machine-ready packaging.

## OMNIMATE Housing – CH20M-67

The new housing offers new assembly dimensions in the 67.5 mm equipment class.

The CH20M-67 sets new standards on the market as a large-scale housing in terms of flexibility for integrating intricate electronic subassemblies. You can distribute the electronic functions over as many as three printed-circuit boards. The front surface of the housings also has a unique size that can be used for freely laying out the operator interface.

Like all housings of the CH20M family from Weidmüller, the CH20M-67 also supports the connection to the mounting rail bus. The system bus is reliably integrated into the 35-mm standard mounting rail and replaces painstaking and error-prone individual wiring.

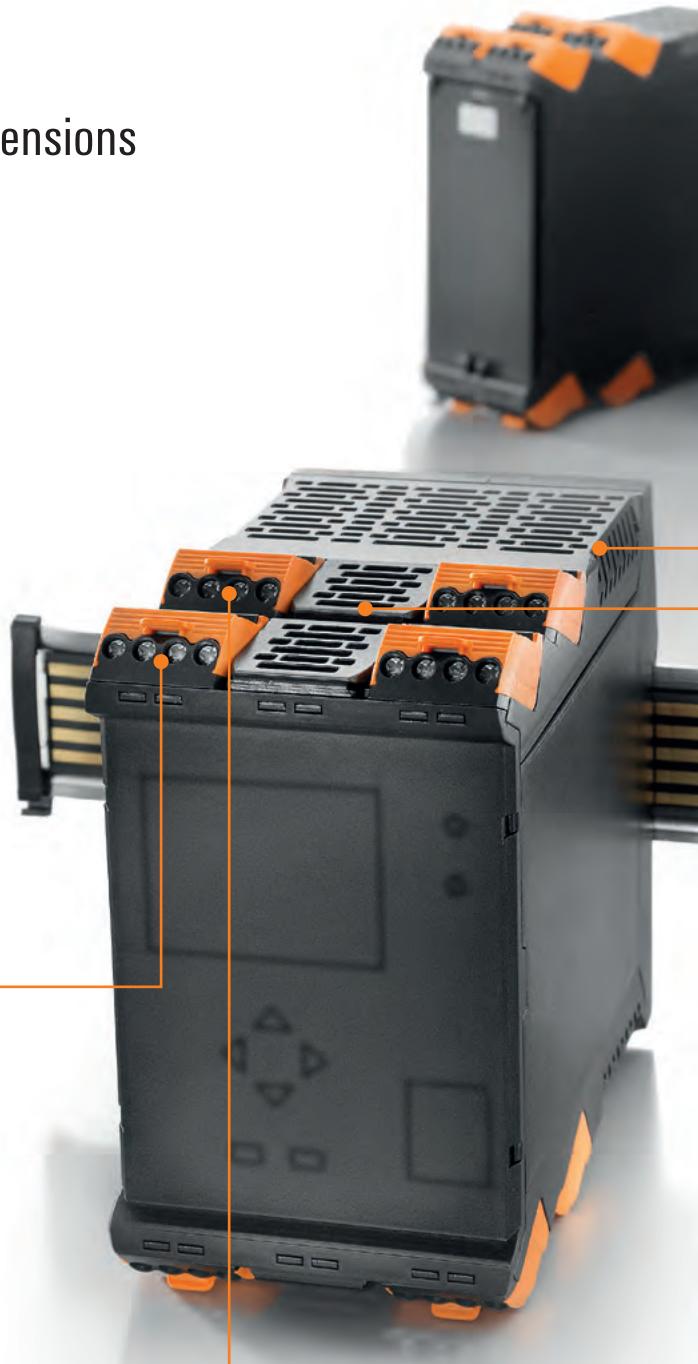

### More reliability when connecting the conductors

Series equipment: The built-in conductor wire guard underinsertion protection prevents the hazardous underinsertion of the conductor and protects it from concealed contact faults. Being wire ready ensures that all connecting points are completely open at delivery.

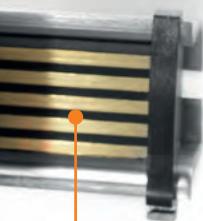

### More speed at installation

Series equipment: Screwed connections with wiring, supported by plus-minus screws, with power tools just right for automatic equipment.

**More layout area**

The side ventilation openings are standard equipment in the semi-cooling design and provide sufficient convection for demanding electronics with the maximised layout area on the printed-circuit board.

**More flexibility for interfaces**

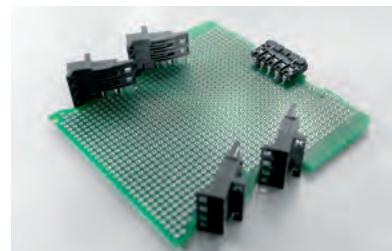

Unused plug-in stations or connections that are only accessible from the factory side can be reliably and permanently sealed with the optional AD-SHL-SMT cover.

**More stability on the mounting rail**

The built-in click-in base is premounted at the factory which guarantees easy, reliable and vibration-free fastening on the DIN mounting rail. A guide with four points of support provides a solid base.

**More design freedom**

There is room for one to three printed-circuit boards placed on both sides CH20M-67. There is maximum design flexibility since each printed-circuit board can take four freely selectable positions in the housing.

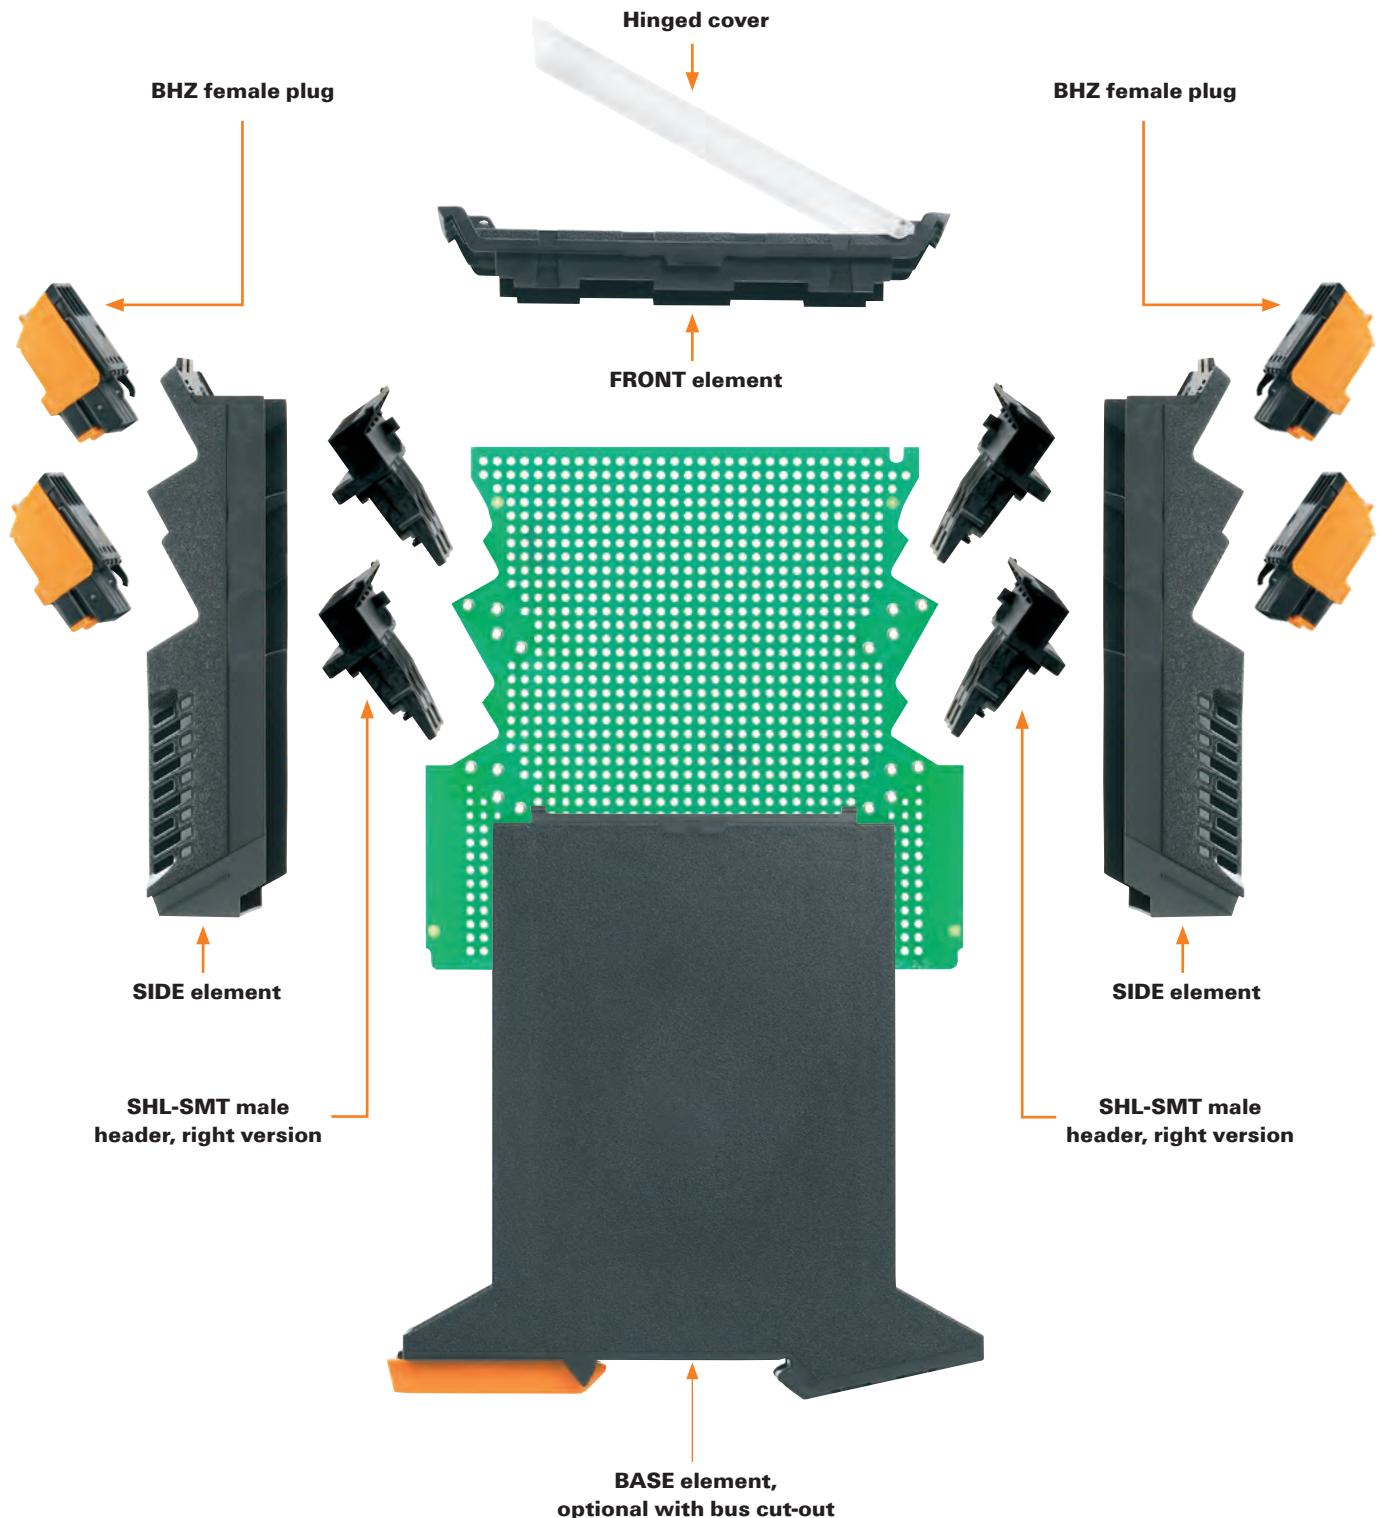

**More mounting space**

The printed-circuit boards can be positioned at a distance of 2.3 mm (and also 5 mm to the housing wall). This gives you the free choice of single- or double-sided assembly.

**Derating curve**

Note: Rated data according to UL – refer to the online data sheet

**Circuit board positions in CH20M**

Housing width (mm)	12.5	17.5	22.5	45.0	67.5
Number of circuit boards	1	1	1	2	3
Positions per circuit board	1	2	2	4	4

**Dimensional sketch**

Our online product assistant is also available for accurate configuration:  
<http://galaxy.weidmueller.com>

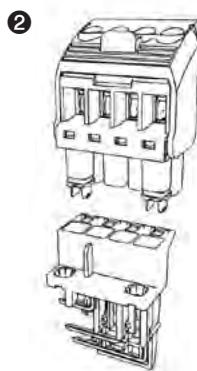

Let's connect.

**Features of the BHZ/SHL connector system**

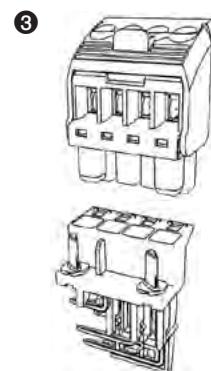

- Clamping yoke screw connection - with "WireReady", wire guard protection and plus/minus screw
- Integrated, captive coding (with "AutoSet" function) protects against accidental mismatch
- Leading contact on the male headers
- Finger-safety provided for both, male and female connector

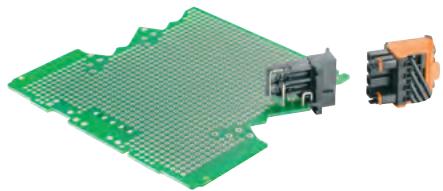

Coding can be set with one of 16 possible configurations

Connecting the female connector

Male header coding transferred to module

**SHL-SMT**

THR male header for modular housing CH20M12-67  
Can be reflow soldered, resistant to high temperatures  
The position of the PCB (see also dimensional sketch) is determined through the configuration of the pin headers  
Suffix 1.5: PCB position 5,0 mm / pin length 1,5 mm (Reflow)  
Suffix 4.2: PCB position 2,3 mm / pin length 1,5 mm (Reflow)  
Suffix 5.9: PCB position 2,3 mm / pin length 3,2 mm (Wave)

# OMNIMATE Housing

## MICROBOX / TERMINALBOX

The MICROBOX and TERMINALBOX series of small housings are the perfect solution for miniature sliced applications or for the protective circuitry used in connection with terminal blocks.

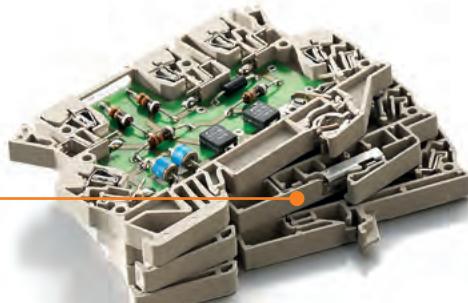

Up to 6 wires can be connected using the integrated (but high-performance) clamping-yoke screw or tension-clamp wire connection mechanisms.

Because of its closed construction, each individual MICROBOX is finger-safe. The TERMINALBOX can be aligned side-by-side without end or closed off using an end plate.

Pluggable cross-connectors from our terminal block line allow simple, safe power distribution of up to 32 A.

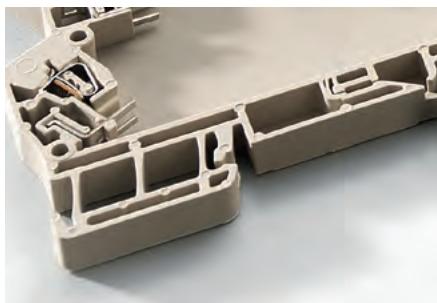

### Secure contacts

The TERMINALBOX MCZ 1.5 can optionally be equipped with a contact element that automatically establishes contact with the rail when the housing is snapped on.

### Compact integration

With a width of only 6.00 mm, the TERMINALBOX MCZ 1.5 provides enough space for a miniature circuit board and 5 tension clamp connection for wires up to 1.5 mm<sup>2</sup>.

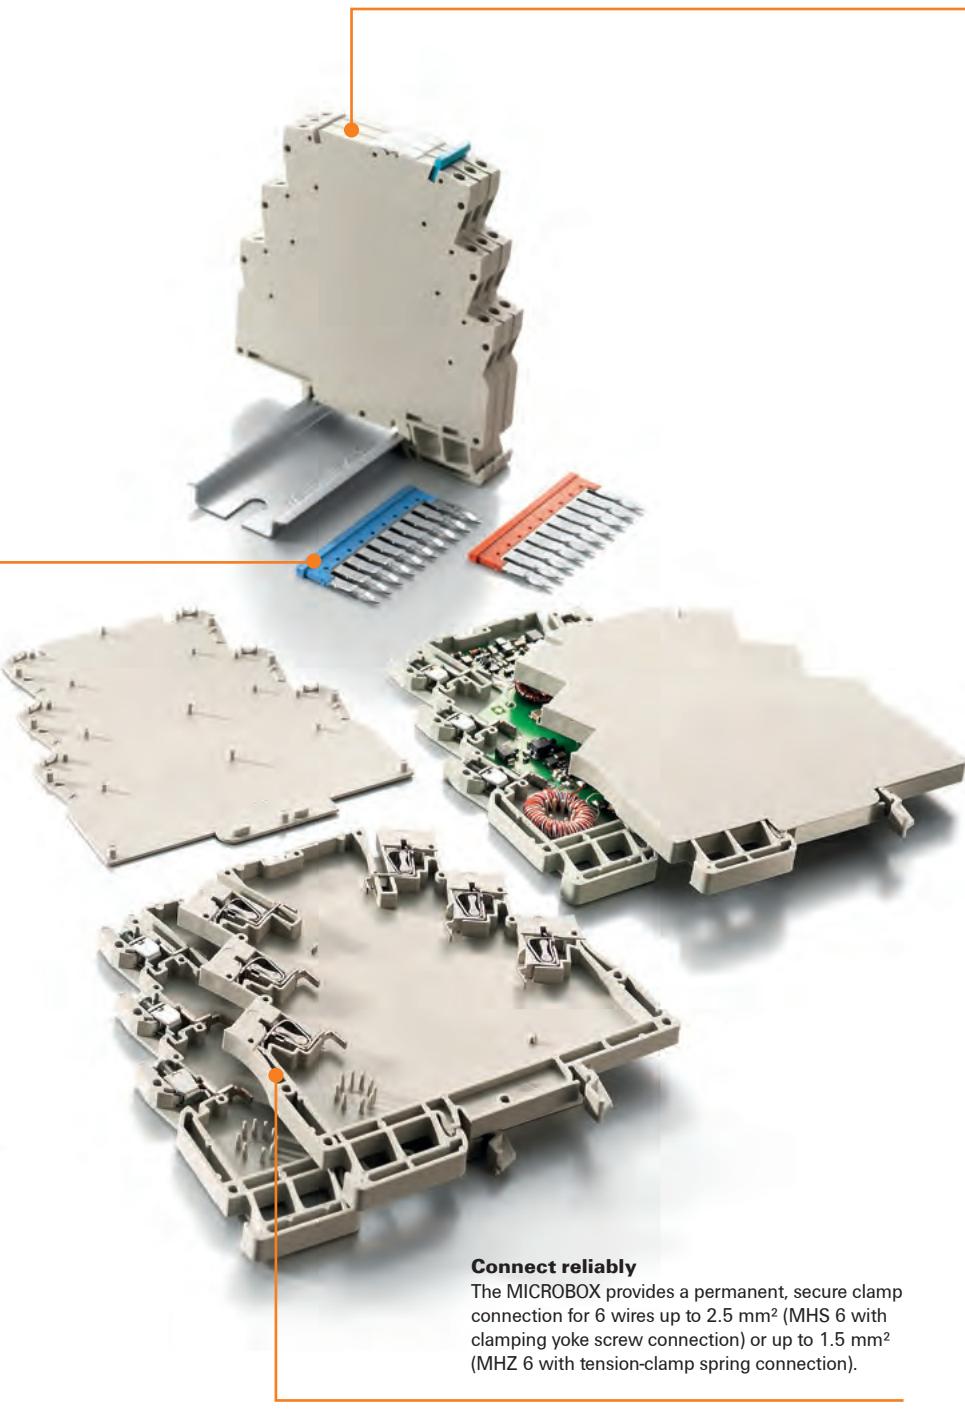

### Seamlessly connected

High-power cross-connectors allow power (up to 32 A) to be easily and quickly distributed on up to three levels.

**Easy to operate**

The transparent hinged covers make adjustments simple (for example, using DIP switches). Labelling is also possible.

**Connect reliably**

The MICROBOX provides a permanent, secure clamp connection for 6 wires up to 2.5 mm<sup>2</sup> (MHS 6 with clamping yoke screw connection) or up to 1.5 mm<sup>2</sup> (MHZ 6 with tension-clamp spring connection).

**MICROBOX MHS 6**

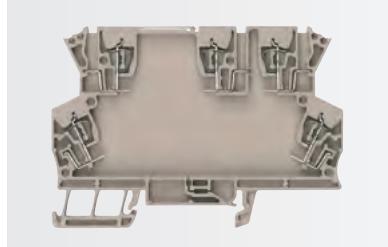

Miniature sliced-section housing in 6.1 mm width A total of 6 clamping yoke screw connections (for 2.5 mm<sup>2</sup> wires) can be manually or selectively wave soldered.

**MICROBOX MHZ 6**

Miniature sliced-section housing in 6.1 mm width A total of 6 tension clamp connection (for 1.5 mm<sup>2</sup> wires) can be manually or selectively wave soldered.

**TERMINALBOX MCZ 1.5**

Terminal-block-format open housings with tension clamp connection for wires up to 1.5 mm<sup>2</sup>. A total of 5 connection elements can be manually or selectively wave soldered.

**MICROBOX 6****1 miniature housing 6 - consists of:**

Screw connection

- 1 terminal carrier for TS 35
- 2 horizontal busbars
- 4 vertical busbars
- 6 clamping yoke units
- 1 housing cover

Tension clamp connection

- 1 terminal carrier for TS 35
- 2 busbars, long version
- 4 current bars, short version
- 1 housing cover

**MCZ 1.5**

The transparent hinged top plate is used for labelling and calibration. Maximum equipment level requires 2 short and 3 long current bars. The space available and the number of connections can be doubled using the frame. CAD drawings that ease the production of layouts and equipping of boards (details of blocked area, max. component heights, pads, etc.), are available on request. The MCZ housing kit consists of:

- 1 terminal holder
- 1 top plate
- 1-5 current bars with tension clamp
- 1 end plate (if required)

# OMNIMATE Housing RS

## Profile housing

### Flexible – more flexible – profile form

Build housing in profile form – the flexible modular system of coloured and transparent PVC profiles and carrier modules the perfect combination of any mounting utilising standard pitches and precisely cut to length, this creates the perfect balance between flexibility and efficiency: The modular approach is ideal for assemblies with high space requirements and is particularly suited for small quantities or variable widths.

#### Flexible covers

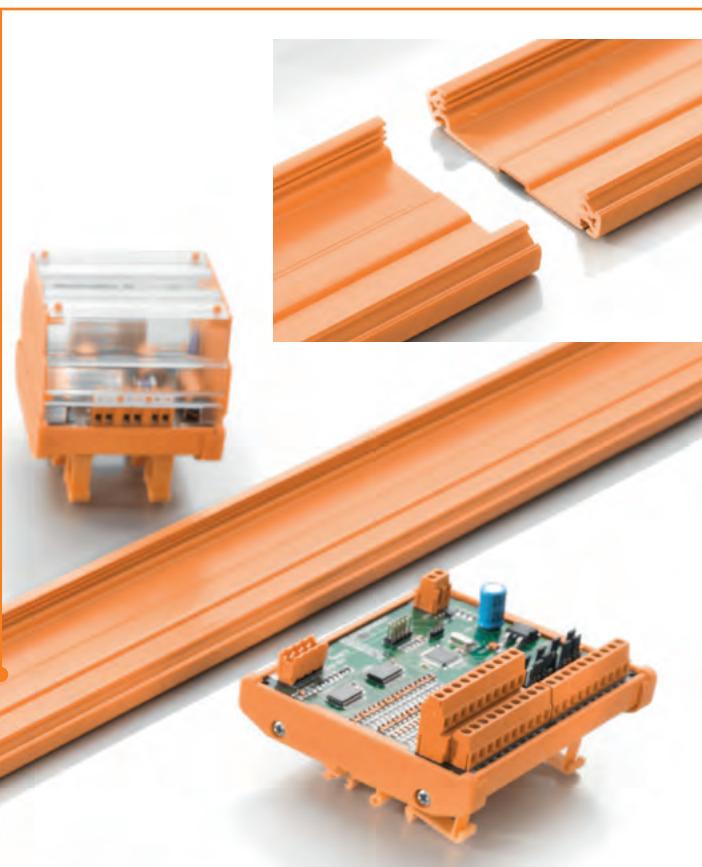

See-through covers in various heights protect assemblies even with high components safely.

#### Flexible installation

Extruded profiles can take several modules next to each other. Depending on the type of circuit boards can be installed on two different levels.

**Flexible lengths**

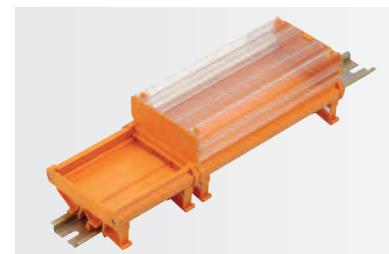

Cut, or joined together in a row: extruded profiles can be easily adjusted to the space requirements of every application.

**Flexible mounting**

Mounting options: snapped onto the mounting rail or directly secured using screws.

**Variable RS-profile housing**

Variable, precision cut extruded profile with different height cover hoods allow maximum packing density even for large electronic sub-assemblies.

**Modular RS-profile housing**

Tool-free latching profiles with standard widths from 5 to 45 mm allow rapid assembly of tailor made solutions.

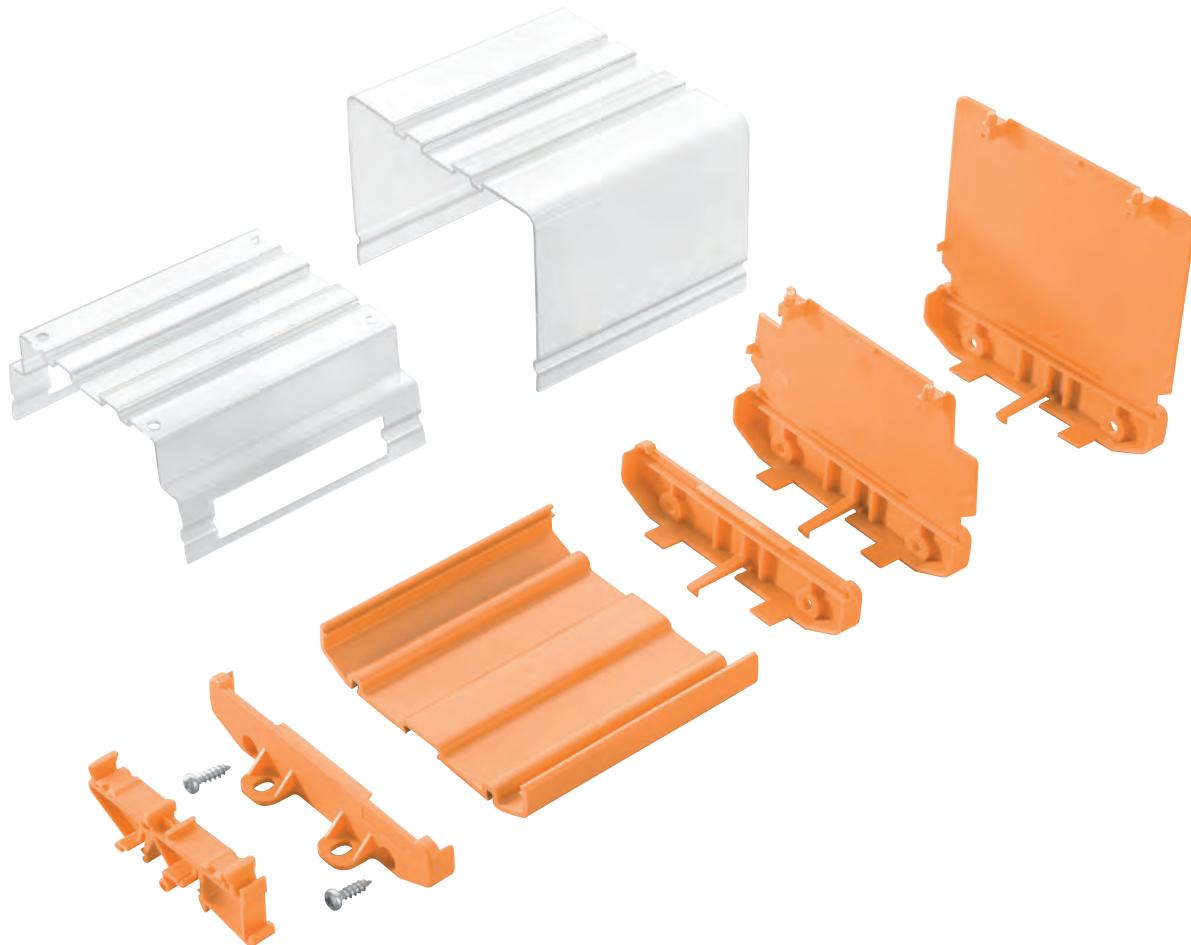

# OMNIMATE Housing RS

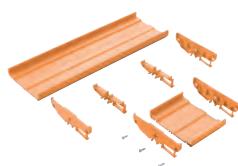

## Profile housing

RS profile housings can be snapped on to DIN rails or mounted directly. They are available in six widths. The extruded profiles can be cut to length or joined together in modules and are ideal for low volume, special assemblies or test set-ups. Fitted transparent hoods are used to protect the components.

Width	Type	Construction/Width of circuit board	Catalogue pages	Colour scale <sup>1)</sup>

**RS 80**

Housing installation (plus 4 screws):

Rail mounted variant (rail mounted assembly)

- 2 end plates for rail mounted assembly
- 2 or more locking feet
- 1 extruded profile
- 1 cover profile (optional)

Direct mounting variant

- 2 end plates, direct mounting
- 1 extruded profile
- 1 cover profile (optional)

**RS 80****Description**

3 heights are available for cover profile and end plates:

Rail mounting without cover:

TS 32 = 45 mm, TS 35x7.5 = 40.5 mm

Rail mounting with low cover:

TS 32 = 72 mm, TS 35x7.5 = 67.5 mm

Rail mounting with high cover:

TS 32 = 91 mm, TS 35x7.5 = 86.5 mm

Direct mounting without/low/high cover:

17 / 44 / 63 mm

Dimensions of PCB

Thickness: 1.6 ( $\pm 0.2$ ) mm, width:

67.8 ( $\pm 0.2$ ) mm

Size of RS segment = PCB length - 4.5 mm

Size of ADP segment = PCB length - 2 mm

Example:

PCB length 160 mm

RS = 155.5 mm, ADP = 158 mm

## Mounting foot / Identification systems

**MTA**

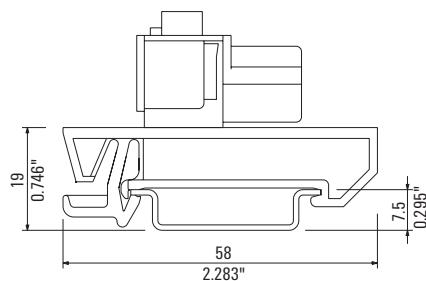

Snap-on foot for terminal rail

**MOFU**

Mounting foot

**WS 10/5****WS 12/5**

MultiCard marking

The MTA 45 mounting adapter enables many different modules to be securely attached to a terminal rail. The adapter, made of fibreglass-reinforced polyamide, ensures high stability and secure fixity to the terminal rail. It is assembled by simply clipping on, and disassembled by pushing up and tilting the module. No tools are required for this.

**Tension clamp terminal tool**

Tool for PCB terminals with tension clamp connections

SD 0,6 x 3,5 x 100  
(DIN 5264-A)

You do not need any special tool to connect or disconnect our tension clamp connections. The opening is designed to accommodate a standard 0,6 x 3,5 x 100 screwdriver to DIN 5264-A (with flat blade), also available from Weidmüller.
